

IBM i (AS/400) Modernization | Cluj-Napoca, Romania

Modernize IBM i. No Migration Required.

Your AS/400 doesn't need replacing - it needs today's technology. iVolve upgrades IBM i systems in place with modern RPG, REST APIs, DB2 optimization, and web interfaces, protecting the business logic you've refined for decades.

// SERVICES

RPG & COBOL Development	Free-format RPG IV, ILE architecture, and CL delivered to enterprise standards.
Web Integration & APIs	REST APIs, JSON services, and web frontends connected directly to IBM i logic.
System Modernization	Green-screen workflows transformed into modern web UIs - business logic preserved.
DB2 for i Optimization	Query tuning, data modeling, and performance engineering for DB2 for i.
System Administration	Security hardening, PTF management, HA/DR, and capacity planning.
Legacy Support	Ongoing maintenance, enhancements, documentation, and knowledge transfer.

// ENGAGEMENT MODELS

01 Fixed-Scope Delivery

Defined milestones, timeline, and outputs for clearly scoped projects.

02 Retainer Advisory

Priority senior expertise, continuous guidance, monthly strategy reviews.

03 Staff Augmentation

Embedded RPG and DB2 capacity with knowledge transfer built in.
